INTRODUCTION

I'm a fullstack web developer. With expertise in both frontend and backend technologies, I am passionate about creating seamless and dynamic web applications.

EDUCATION

Bachelor of Computer Applications, DIT University, Dehradun   2024-2027

SKILLS

Frontend: React.js, Next.js, CSS, JavaScript, Tailwind CSS, GSAP
Bootstrap Backend: Typescript, Node.js, Express.js, MongoDB, PostgreSQL, Firebase, Supabase
Other Technical Skills: Git, Github, Linux, AWS, APIs, CI/CD, Vercel, Netlify, python, Figma

EXPERIENCE

Freelance web developer - building landing pages and managing frontend, UI/UX.
Undergraduate researcher @DIT University in the field of Biometrics and feature fusion.

PROJECTS

Cally: AI-powered timetable sync application using Gemini APIs for multi-format parsing (CSV, PDF, images) with Google Calendar OAuth integration, built in React TypeScript with real-time sync and responsive design.

Expense Tracker: with budget categories, recurring payments, and visual spending reports using charts.

Build3X Bootcamp Platform: Developed a 4-week virtual web development bootcamp platform with structured curriculum, mentor profiles, and Discord-based community support; implemented responsive UI, project tracking, and application management with dynamic forms and FAQs to enhance user engagement.

ACHIEVEMENTS

SIH Finalist at the intra-college hackathon.
Winner at THM-Delhi Security Quiz Top 3.
Discovered critical bugs in Snapchat.inc and Dehli Government's Education Department's website.

VOLUNTEERING

Technical Coordinator: Efficiently orchestrated TSR and GMS teams at the 38th National Games India, ensuring precision results and schedules in the game of Wushu and managing VIP movements in the game of Netball.
